

Virtual Molecular Tumor Board

simplifying cancer genetics

HOW vMTB WORKS?

EASY 5-STEP PROCESS

- **CASE SUBMISSION**
Clinical information is submitted with the genetic report and key questions.
- **CASE SUMMARY**
Patient's case summary is created and reviewed before final submission to the board.
- **CASE OPINION**
Case is assigned to the board members for review and opinion on the various treatment options.
- **CASE COMPILATION**
Case convener compiles opinions and provides final recommendation.
- **REPORT GENERATION**
Finalized report is made available for download.

MOLECULAR ADVICE BY CANCER EXPERTS. ANYTIME ANYWHERE

Virtual Molecular Tumor Board (vMTB) delivers personalised cancer medicine advice from experts globally at your doorstep through the mobile app. These expert minds work together to decipher the unique genetic changes of the patient's tumor, translating into personalised clinical decision. The member physicians from around the world are experts in diverse fields that span basic cancer biology, medical/ clinical

genetics, molecular pathology, surgical pathology/ cytopathology, pharmacology, medical oncology and radiation oncology. This concept provides comfort to both, member physicians and patients to provide the best opinions on the future course of actions.
